Ultimate Guide for Magento 2 Speak Search

Introducing the Magento 2 Speak Search extension allows Magento store owners to add Voice Search functionality to their Magento store, using which store visitors can easily search for products using voice commands. When they speak, this module takes the voice input and converts the same into text & displays the search results.

- Voice Search is a Magento2 Extension to make searching more easy through a smart voice query.
 - This extension is most useful in mobile devices with small keyboards. It is a great way to enhance your Magento 2 store's search functionality
 - users can view a 'MIC' icon near the search box.
 - Customers can search for products/brands by simply clicking this button and speaking out.
-

How to install the extension

1. Install via composer (recommend)

- Enable maintenance mode **php bin/magento maintenance:enable**
- Run the command **composer require mageinic/hyva-speak-search**
- Run the command **php bin/magento module:enable MagelNIC_Core Hyva_MageINICSpeakSearch**
- Run the command **php bin/magento setup:upgrade** to install the extension
- Run the command **php bin/magento cache:clean** to clean the cache
- Disable maintenance mode **php bin/magento maintenance:disable**
- Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.

2. Upload via ZIP/Archive

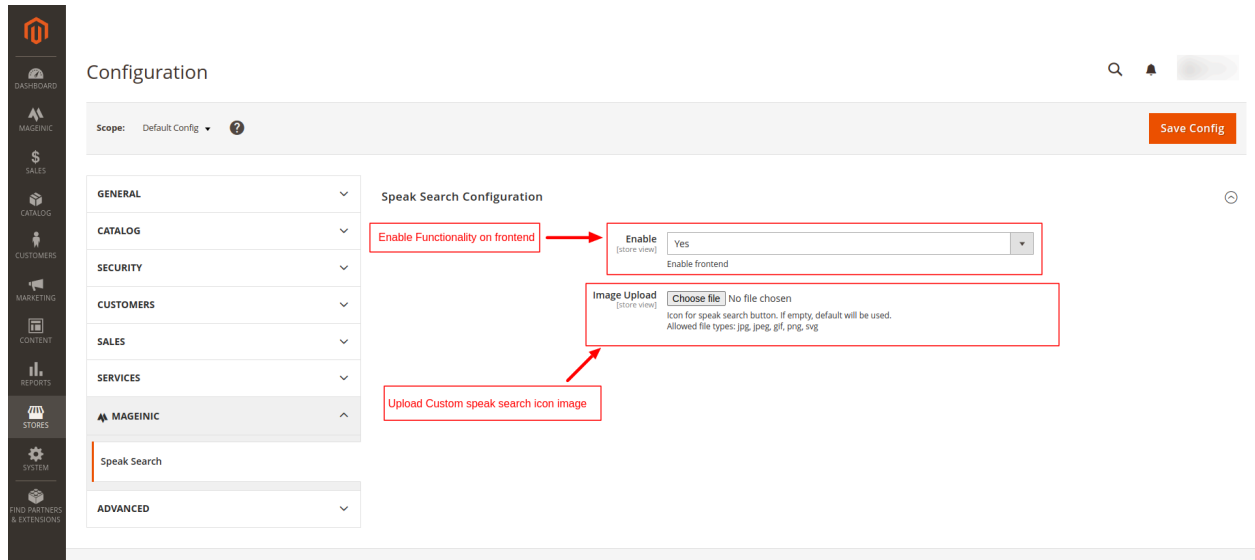

- Back up your store's database and web directory
 - Download the extension zip file and extract the zip file
 - Transfer the **Hyva** folder to the Magento 2 **app/code/** directory on the server
 - Enable maintenance mode **php bin/magento maintenance:enable**
 - Run the command **php bin/magento module:enable MagelNIC_Core Hyva_MageINICSpeakSearch**
 - Run the command **php bin/magento setup:upgrade** to install the extension
 - Run the command **php bin/magento cache:clean** to clean the cache
 - Disable maintenance mode **php bin/magento maintenance:disable**
 - Check the store environment if everything is working properly. If, at any point, the store displays an error, check the Magento logger for more details.
